

Backing Safety Tip

- Driver backs only if necessary
- Use a guide person if the area to be backed into could not be readily seen
- Driver should get out and look behind the vehicle before starting to back
- Driver should check completely around the vehicle for hazards before getting in
- Driver sounds horn and uses 4-way flashers
- Driver start to back immediately after getting in the vehicle
- Driver complete a driver's side back which provided the best view of the area behind our vehicle
- Driver back slowly
- Driver uses mirrors (and camera monitor if equipped)
