

PRACTICE TOUCH UP

GE ASIS LOADS

QUESTION

How can you identify when your warehouse requires the scanning of a GE ASIS load?

Answer ... _____

Whenever there are 60 or more ASIS units in the warehouse that have a Legacy ASIS INS receipts attached. It is best practice to have a variety of appliances in an ASIS load, if you don't have a mixed variety please reach out to your GE RM to identify if there are ASIS buyers looking to purchase certain type of appliance(s).

WHY IS THIS IMPORTANT?

- Reduce ASIS quantity in warehouse and maximize warehouse space.
- Reduce GE scrap, by selling ASIS units before they are deemed too old or too damaged for ASIS sale.
- Reduce inventory scan efforts by keeping ASIS bucket minimal and ASIS loads scanned & accounted for.
