

PRACTICE TOUCH UP

NON-GE BACKHAUL

QUESTION

How long should an inventory clerk wait before manually adding a NON-GE INS to the backhaul list?

Answer ...

A NON-GE INS should be added manually to the backhaul list after 96 business hours (excludes Saturday, Sunday & holidays)

WHY IS THIS IMPORTANT?

- Movement of NON-GE units out of your warehouse to maximize space & reduce storage
- Accountability for NON-GE units (the longer a unit ages, the more likely you will lose sight of it)
- Reduction of freight claims from NON-GE vendors due to aging units
- Improved warehouse metrics by driving Warehouse Team communication with Inventory Team!
(ONE team ONE goal)
