

## Turning and Curves

Turning demands special care and an observant eye from you as a defensive driver. You should be aware of other vehicles in your path, and of the complete configuration of the turn you are about to undertake.

Precautions that are required to avoid turning accidents:

7. Plan ahead and be aware of the complete configuration of the turn you are about to undertake.
8. Slow down – you control the speed of the vehicle.
9. Be aware of the ground objects (signs, parking bollards, key pads) to provide adequate space for your vehicle to operate.
10. Practice eye lead time, it allows you to have smooth turns by seeing the turn well in advance and preparing to make the turn.
11. Aim High in Steering it keep your vehicle in the center of the lane also allows you to have a safe path on turns by picking an imaginary target through your turn and steering your vehicle towards it. This way you keep your eyes ahead and look well through the turn.

Prevention of turning and curb accidents is what it's about, so  
Plan Ahead, Slow Down, Practice and Aim High
